ALPINE by James Dunlop

The Alpine Collection is inspired by the mountainous regions of New Zealand and in particular the Tongariro National Park. This collection explores the reconnection to nature and embraces inspiration drawn directly from the great outdoors. Volcanic landforms, domes, cones and lava create a vivid and dynamic landscape, influencing the surface designs of the collection. At a macro level, the alpine herb garden, a diversity of plants with delicate forms and rich colours inspired both pattern and scale in Alpine.

TERRAIN

Drawing from the textures of the landscape, Terrain provides a soft-to-touch handle, creating a rich warmth in interior spaces. The design is woven to create a pattern-enacting texture in a blend of natural fibres. A tonal colour palette reinforces the warmth and touch of this construction.
